## SCHEDULE OF ONLINE SUBJECTS 2020

## **Higher Education**

Endeavour College recognises it isn't always possible to make it to campus when trying to balance work and personal commitments. Endeavour College offers students who cannot, or prefer not to attend sessions on campus, the ability to study some subjects online.

Endeavour College delivers these subjects over the internet using a variety of presentations and communication tools.

Weekly lectures are narrated, recorded and presented online. Students can choose to download class notes, podcasts or even iPod versions of lectures. Students have the choice of participating in discussions through forums, blogs and wikis.

Staff and students enrolled in online subjects can communicate through instant messaging, Skype and virtual classrooms.

Assignments are able to be submitted electronically and posted back to the student through an online learning environment. Some subjects make use of virtual labs which provide realistic simulations using rich multimedia.

Students undertaking online subjects are supported with one dedicated online tutor for each subject to help support their learning through to graduation.
