STUDY A DEGREE IN NATURAL HEALTH
Bachelor Degrees in Acupuncture, Naturopathy, Nutritional & Dietetic Medicine, Myotherapy and Complementary Medicine
A message from our Dean

Thank you for considering Endeavour College of Natural Health as a potential place to study your chosen career. Endeavour College has campuses across Australia with a student body in excess of 5,000. With intimate classes, the open exchange of ideas is important and we encourage you all to learn from those around you either on campus or with your online community.

Endeavour College of Natural Health offers a range of academic courses in myotherapy, naturopathy, nutritional and dietetic medicine, acupuncture and complementary medicine as well as cutting edge research in the natural health field.

The College fosters an atmosphere that is respectful, supportive and welcomes students from all demographics and cultural backgrounds. As everyone at Endeavour shares the common interest of helping others, you will find a strong camaraderie among your peers.

I know you will be impressed by the professionalism of the staff and the quality of their teaching as well as the support and guidance of our Student Services team. We are a national and international leader in the field of natural medicine with some of Australia’s most respected lecturers teaching across all modalities of study.

We specialise in clinical practice so one of the greatest benefits of studying with Endeavour is the amount of actual hands on, real life experience you will gain as a student. The Wellnation Clinics are set up for you to be a practitioner and work your practical hours with paying clients in a supported and friendly environment, on campus. Endeavour offers a unique opportunity to shape your individual specialisation and to work in collaboration with other areas of natural health within the same clinic.

During your clinical practice, you will learn real business skills which will help you understand the nuances of running a business, which many of our graduates achieve after completing their courses.

An exciting time awaits you in the months ahead. Best wishes with the decisions you make now for your future. Choose a degree that ignites your spirit.

Dr Melisa Rangitakatu
Dean and Operations Director

My experience as an Endeavour scholarship student has been a time of knowledge, experience, and innovation. Endeavour provides an environment that allows you to develop each of these skills in a unique way.

Shania Haddon
Naturopathy (Sydney Campus)
Why start your journey with Endeavour?

People Power
We are the largest natural health college in the Southern Hemisphere. We have been around since 1975. You will learn from some of the natural health industry’s best teachers, rub shoulders with some of its superstars and no doubt discover like-minded people amongst your peers.

30,000+ graduates

Nourishment
Everyone needs a little nourishment on life’s journey. At Endeavour your class sizes are small and intimate, meaning you will receive the support you need to succeed. The Student Services and Academic teams are here to support you every step of the way. If you need a little help to get started, check out more on our school leaver scholarship program on page 6.

Support every step of the way

Work-ready
It’s OK if you’re not thinking about work right now, but keep this in mind. As an Endeavour student you will complete hundreds of practical, clinical hours at our Wellnation Clinics during your course. With this hands-on experience and Endeavour’s strong links to business and industry, you will be well and truly work ready when you graduate.

100s of hours of hands-on experience

Success
We offer five bachelor degree options, including a non-clinical Bachelor of Complementary Medicine. All you need to do is choose where to start. As the graduate stories and testimonials will show, you will soon be on your way to success.

From five degrees to everywhere

Direct Entry
As a private college, we do not require you to achieve a specific ATAR or Year 12 score. Before you get too excited, you do need to complete Year 12 or an equivalent level of study to meet the entry requirement. Just as importantly you need to show us you’re passionate about natural health and wellness study by putting your best foot forward in an interview. Studying science and maths at school will help in your transition to natural health study, but there are no specific subject pre-requisite entry requirements.

Start when you are ready
Which course is for you?

Remember you can enrol directly in any of our Bachelor degrees. You can commence study in any month of the year, either online or at any of our six campuses across Australia.

Pay for your course with FEE-HELP

Did you know, students studying any of our Bachelor degree programs may be eligible to access FEE-HELP.

FEE-HELP is a government provided loan scheme that assists eligible fee paying students pay all or part of their tuition fees. You can find out more information by speaking to one of our friendly advisors.

Visit endeavour.edu.au/future-students/fees-and-payment-options or the Study Assist website directly.

Locations

As the largest natural health college in the southern hemisphere by depth and breadth of course offerings, you will find Endeavour located in six major Australian cities. You can move between campuses as you study if you choose! Each campus is centrally located and well-serviced by public transport. Our facilities vary at each campus but they include bright, modern classrooms, clinical practice rooms, libraries, cafes and inviting spaces to hang out and study.
Scholarship Program

Financial Leap Forward!
Let us help you get started.

Do you excel at the sciences and communicate with ease? Endeavour College of Natural Health offers undergraduate scholarships for school leavers and gap year students aged 17 to 19 years of age (at time of application);

- Academic Achievers Scholarships
- Aboriginal and Torres Strait Islander Scholarships

Academic Achievers Scholarships

The Academic Achievers Scholarship is offered nationally to study in any one of our leading Bachelor of Health Science degrees in Naturopathy, Nutritional and Dietetic Medicine, Acupuncture or Myotherapy available at any one of our six campuses and the Bachelor of Complementary Medicine available online. Endeavour will cover a portion of your tuition fees for the duration of your course. I.e. This equates to 4 credit points worth of study each semester.

Aboriginal and Torres Strait Islander Scholarship

The Aboriginal and Torres Strait Islander Scholarship is designed to engage students with Aboriginal and Torres Strait Islander heritage. This allows an opportunity to be involved in a teaching and learning environment, to engage in your discipline of choice and be involved in college activities to raise awareness of the Aboriginal and Torres Strait Islander culture with the support of the College.

This scholarship is offered nationally to study in any one of our leading Bachelor of Health Science degrees in Naturopathy, Nutritional and Dietetic Medicine, Acupuncture or Myotherapy available at any one of our six campuses and the Bachelor of Complementary Medicine available online. Endeavour will cover a portion of your tuition fees for the duration of your course. I.e. This equates to 4 credit points worth of study each semester.

Intakes available for both Semester 1 and Semester 2

For further information and terms and conditions visit endeavour.edu.au/scholarships

More than 69% of Endeavour students go on to work in clinical practice and 28% work in a health related field in retail, teaching or promotion.

2017 School Leaver Scholarship Recipients

**Asha Bygraves**  
Naturopathy (Perth Campus)

The School Leaver Scholarship has provided me the financial support to help with relocating from the country to living in the city independently, but more importantly it has enhanced my self-confidence as I embark on my journey as a natural health practitioner. At Endeavour, everyone is respected as an individual and their various interests and needs are considered. The classroom teaching environment provides one on one interactions and opportunities for open discussions. It is a privilege to be a part of Endeavour’s nurturing community and everyday I am able to connect with other inspiring individuals. If you are considering a career in natural health, I highly recommend applying for a scholarship to help kick start your natural health career! There is honestly nothing more rewarding than seeing people holistically heal from the inside out!

**Danielle Bichler**  
Naturopathy (Sydney Campus)

Endeavour College has a very unique learning environment including smaller class sizes, which have allowed me to network with, and meet incredible like-minded people from all walks of life. The lecturers are fantastic and willing to go above and beyond for their students. The knowledge they have gained in their chosen fields is often shared through their professional and personal experiences in the natural health industry, which is incredibly inspiring. The scholarship program allowed me to develop connections with other students and lecturers that I otherwise would not have had the opportunity to meet so early on in my degree. If you are thinking of applying for a scholarship, my advice is to go for it! I was so grateful for this advice as it paid off!

**Lara Tilley**  
Nutrition (Adelaide Campus)

Being an Endeavour Student Ambassador this year has allowed me to associate with like-minded individuals, particularly through involvement at the various Open Days and Career Expos. Speaking to both recent graduates and current students, my passion for health has grown and evolved. Not only was the scholarship an immense financial support, but it has also provided me with the opportunity to discover which career path is best suited to me, as well as helping develop my public speaking and interpersonal skills. I look forward to continuing my studies next year, as well as meeting a new cohort of Endeavour students and developing professional networks. I am also interested in pursuing the honours research program once I complete my degree.

**Shania Haddon**  
Naturopathy (Sydney Campus)

My experience as an Endeavour scholarship student has been one of knowledge, experience, and innovation. Endeavour provides an environment that allows you to develop each of these skills in a unique way. I was able to gain more depth to my learning by being able to interact with my lecturers and share in-depth class discussions which have improved my knowledge and learning capacity.

The scholarship provided more than just financial support. As a scholarship student I have been involved in working at Open Days and other college events such as Orientation Week. This experience has helped me gain a greater understanding of what Endeavour stands for and the many opportunities they provide for their students.

During my studies I have also been able to manufacture my own product, learn how to individualise my own practice, and learn the many different paths I can take with my career.

Endeavour provided me with the environment to develop these skills and I look forward to learning more in my future studies.

**Stephanie Antolis**  
Acupuncture (Adelaide Campus)

My scholarship experience at Endeavour has provided me with invaluable opportunities and skills, inspiring my career path and enriching my life. Events such as open days and career expos have allowed me to refine my public speaking skills, but more importantly, improve confidence in pursuing my passion for health. Talking to future and potential students solidified my decision to choose Endeavour as my next step toward a career in natural health.

Studying my first year on campus gave me the opportunity to make long-lasting friendships and meaningful connections with lecturers and students across varying years and degrees.

Being a leader and representative for the college also provided me with a great sense of identity, gaining confidence in myself and my knowledge of health.

My first year was a deeply meaningful experience and I can now say, going into my second year, I have grown more confident as a person, and richer in character. Endeavour is clearly the leading choice for a degree in natural health.

endeavour.edu.au
Work-integrated learning environment – be industry ready!

Real life experience practising in the Wellnation Clinic is the greatest benefit of choosing Endeavour College when you study Natural Health.

The Wellnation Clinics within each college are open to the general public and receive fee-paying clients. Students have the opportunity to treat in a safe, supportive and professional environment, supervised by qualified practitioners. Students can apply their academic knowledge, learn practical skills while treating patients as well as gain an understanding of all the principles of running their own clinic in the future.

Clinical practice provides students the opportunity to work with peers and with different disciplines of natural medicine.

Across Australia, Wellnation Clinics treat more than 1,000 clients each week. Our network of clinics work with over 30,000 clients across all demographics and with a variety of conditions. Before graduation, you will have already gained hundreds of hours of practical, hands-on experience and be a confident practitioner with skills vital for your new career as a naturopath, acupuncturist, myotherapist or nutritionist.

Wellnation Clinics

wellnationclinics.com.au
Accreditation and professional recognition

You (and your parents) might like to know that we develop our courses with professional associations, external academics, clinicians and alumni. We regularly review all our courses to make sure they meet our students’ and industry’s needs.

Each of our Bachelor degree courses are formally assessed and accredited by the Australian government national regulator for Higher Education, the Tertiary Education Quality Standards Agency (TEQSA). Our Bachelor of Health Science (Acupuncture) has been approved by the Chinese Medicine Board of Australia (CMBA), the regulatory board for practitioners. Endeavour is the preferred education provider of Massage and Myotherapy Australia, the professional association for Myotherapists.

Once you graduate you are eligible for membership with professional associations relevant to your field of study, such as Complementary Medicine Association, The Nutrition Society of Australia, and the Australian Natural Therapists Association.

We educate first-rate professionals, perfectly positioned to service the thriving health and wellness sector.
Bachelor of Health Science (Acupuncture)

The ancient practice of Acupuncture, a form of Traditional Chinese Medicine, has become a widely used treatment option in Australia. Acupuncture stimulates specific points on the body in order to regulate the flow of Qi (Vital energy) to balance the functions of the body, mind and spirit and restore health.

Chinese Medicine combines theory (philosophy and principles) and practices such as acupuncture, Chinese herbs, Chinese dietetics, Chinese exercise therapy (Qi Gong) and Tui Na (Chinese massage).

Duration/Entry

- 4 years full time: 24 contact hours per week
- 8 years part time: 12 contact hours per week
- 740+ hours student practitioner experience

Entry Requirements:

- Direct entry
- Year 12 or equivalent (ATAR score not required)
- English language proficiency equivalent to a 7.0 IELTS result

Career Opportunities

- Acupuncturists may practice independently in their own clinic.
- Work alongside other allied health professionals such as medical doctors, physiotherapists, osteopaths and naturopaths.
- Choose to specialise in a particular area of interest such as women’s health, men’s health, chronic disease, pain management and more.
- Graduates may be eligible to pursue post-graduate programs and education roles.

Our graduate story – Chris Fehres

Acupuncturist / Business Owner

After completing his Bachelor of Health Science in Acupuncture in 2015, Chris went on to start his own thriving clinic in Brisbane which focuses on musculoskeletal conditions, sports injuries, and pain pathologies.

He graduated with distinction and was awarded the medal of academic excellence for highest achievement in acupuncture across Australia. Chris is currently a contract tutor at Endeavour College in addition to being the alumni representative for the Course Advisory Committees in the Acupuncture and Biosciences departments.

“One of my goals now is to become an anatomy lecturer for acupuncturists and other natural medicine practitioners. The complex and intricate structures of our bodies are telling us a story we haven’t yet fully understood, and they have so much to teach us if we listen to them. I want to play my part to encourage those stories to be heard.”
DID YOU KNOW?

Tongue diagnosis is a foundational diagnostic technique used by acupuncturists and practitioners trained in Chinese medicine. Nearly all of the zang-fu organs (such as the kidney, lungs, heart, stomach and spleen) have a representational place on the tongue. Meaning an Acupuncturist can often ‘see’ how these organs are performing just by looking at the tongue for a few moments.

In tongue diagnosis the tongues movement, shape, colour, coating and how moist or dry it is all correlate to the health or function of the internal organs.
Bachelor of Health Science (Myotherapy)

Myotherapy is a branch of manual medicine that focuses on the treatment and management of musculoskeletal pain and dysfunction. Myotherapy involves an extensive physical evaluation and an integrated therapeutic approach in the treatment of affected muscles, joints and nerves. It uses standard methods of assessment such as postural evaluation and neurological and functional testing to determine the particular cause of musculoskeletal pain and associated dysfunction.

Duration/Entry

- 3 years full time: 24 contact hours per week
- 6 years part time: 12 contact hours per week
- 350+ hours student practitioner experience

Career Opportunities

- Myotherapists may practice independently in their own clinic
- Work alongside other allied health professionals such as, physiotherapists, osteopaths and naturopaths.
- Work with specialised groups such as athletes and sporting teams.
- Specialise in pre and postnatal care, aged care, rehabilitation and palliative care.
- Graduates may be eligible to pursue post-graduate programs and education roles.

Entry Requirements:

- Direct entry
- Year 12 or equivalent (ATAR score not required)
- English language proficiency equivalent to a 7.0 IELTS result

Our graduate story – Rhianna Bridgett
Myotherapist / Sports Lover / Tutor

Rhianna Bridgett is a Melbourne-based Myotherapist, between working with professional AFL players and in private practice, Rhianna is also completing the Endeavour Myotherapy Honours degree. Rhianna’s Systematic Review was recently published in the The Journal of Alternative and Complementary Medicine.

Her love affair with manual therapies has now gone full circle, with Rhianna recently accepting a lecturing position at Endeavour to help educate Australia’s next wave of myotherapists.

“Endeavour lecturers each have their individual flair on treatment and assessment, and being exposed to them in hands-on classes and clinics is something I am grateful for.”
Did you know that simple, regular movement can improve your study performance? If you’re sitting at a desk studying all day, Endeavour graduate and Move Free owner Matt Kos, says get up and do some old fashion exercise during your study breaks. This will benefit both body and mind, help keep your focus and achieve your best results!
Bachelor of Health Science (Naturopathy)

Naturopathy is a whole medical system combining an array of natural therapies to support healing and maintain health. Naturopaths aim to treat the underlying causes of illness and disease. Students experience a holistic learning environment, broadening their studies across biological sciences in order to understand the human body and its functions. The core principle of “healing through nature” guides the naturopath’s use of nutrition, dietary counselling, herbal medicine, manual therapies, flower essences, lifestyle education and homeopathy.

Duration/Entry

- 4 years full time: 24 contact hours per week
- 8 years part time: 12 contact hours per week
- 650+ hours student practitioner experience

Entry Requirements:

- Direct entry
- Year 12 or equivalent (ATAR score not required)
- English language proficiency equivalent to a 7.0 IELTS result

Career Opportunities

- Naturopaths may practice independently in their own clinic.
- Work alongside other allied health professionals such as medical doctors, physiotherapists, osteopaths and acupuncturists.
- Choose to specialise in a particular area of interest such as women’s health, children’s health, chronic disease, autoimmune diseases, environmental medicine and more.
- Naturopaths regularly appear in the media as subject matter experts, produce content and work with brands to develop products.
- Graduates may be eligible to pursue post-graduate programs and education roles.

Our graduate story – Alyce Cimino

Naturopath / AHARA HEALTH Founder

As a child, Alyce Cimino loved following her father through Sydney’s Flemington Markets with a trolley, helping with the fruit and veggie shopping. Little did she realise she was soaking up knowledge for her future career.

Yet Alyce’s first choice of study was psychology. After a year of feeling it wasn’t quite right, she put her studies on hold and worked in childcare. When she witnessed children eating gingersnap cookies for breakfast, Alyce started to look for a way to help people make healthier choices. One day, she accidentally sat in the wrong room at an Open Day and fell in love with naturopathy – the use of herbal medicine and nutrition for good health. She enrolled that very day.

Alyce completed a Bachelor of Health Science (Naturopathy) and says it was her time in the teaching clinics, completing the practical component of her degree that gave her the passion to go into clinical practice. She dreamt of being part of a multi-modality clinic.

In January 2018, things fell into place for Alyce. She opened the naturopathic and whole food collective AHARA HEALTH in Newport on the northern beaches of Sydney. ‘Ahara’ comes from the Ayurvedic practice of using food to nourish the body and mind. It was a perfect fit. While Alyce says opening a business is wonderful, scary and overwhelming, she remains passionate about helping people to make small changes that have big benefits.

Business is going well and the team will soon expand their services to health events, talks, cooking classes and retreats as well as clinical practice. Alyce sees a big movement towards natural health. And, she says, if your heart is in the right place, it is an endless gift.
DID YOU KNOW?

Herbs are one of the key treatments prescribed in the practice of Naturopathy and Herbal Medicine. A change of season usually goes hand in hand with increased susceptibility to pathogens. Protect yourself against common illnesses (such as colds and flus) by boosting your immune system with healing herbs. Here are some of the top immune-enhancing herbs:

- Green Tea
- Turmeric
- Black Elder
- Ginseng
- Oregano
- Sage
- Garlic
- Cat Claw
- Milkvetch
- Echinacea
- Eleuthero
Bachelor of Health Science (Nutritional and Dietetic Medicine)

Clinical nutritionists integrate traditional food wisdom and current evidence to motivate individuals and communities to eat well and live healthier lives.

Disease prevention is approached and managed through a multidimensional lens. Nutrient adequacy, food quality, dietary behaviours and lifestyle are assessed in order to develop individualised Nutrition Care Plans. Nutritional and Dietetic Medicine studies broaden during the degree to include nutritional biochemistry, weight management, clinical nutrition, dietary planning, sports nutrition, nutritional physiology research and public health nutrition.

Duration/Entry

- 3 years full time: 24 contact hours per week
- 6 years part time: 12 contact hours per week
- 460+ hours student practitioner experience

Entry Requirements:

- Direct entry
- Year 12 or equivalent (ATAR score not required)
- English language proficiency equivalent to a 7.0 IELTS result

Career Opportunities

- Clinical nutritionists may practice independently in their own clinic.
- Work alongside other allied health professionals such as medical doctors, physiotherapists, osteopaths and fitness professionals.
- Upon graduation you may also pursue a career in population or corporate health, media and content creation, food and product development and more.
- Graduates may be eligible to pursue post-graduate programs and education roles.

Our graduate story – Justyna Kalka

Nutritionist / Public Speaker / Educator / Practitioner

Justyna is a clinical nutritionist, speaker and health educator who specialises in promoting optimal health through wholesome food and movement.

After completing a Bachelor of Health Science in Nutritional Medicine at Endeavour, Justyna devoted herself to educating others about the true vitality that comes from a careful balance of real food, the right mind set and a healthy dose of movement.

She is a popular speaker on health and nutrition, providing presentations and workshops for schools, city councils and organisations across Melbourne. Justyna says she feels very fortunate to be able to live her passion everyday, through her work within educational and corporate health programs, including SANO Health for Australia Post, Origin Energy and various others, as well as Beautiful Minds – Australia’s leading provider of self-esteem and confidence education for teens.

Being part of someone’s journey towards healthier living is what Justyna describes as the most rewarding aspect of being a nutritionist – “What gets me excited in my work is the empowerment people feel when given the tools to build the health and vitality they desire.”

Justyna’s nutrition expertise has featured in the media, with appearances on Channel 10 News and contributions to nutritional stories in Nourish and Australian Natural Health Magazines, among various others.
DID YOU KNOW?

Fermented and probiotic food benefits have come into the spotlight with the rise in gut health awareness. Your gut is thought to be your “second brain” as it’s been shown that there’s an entire ecosystem of bacteria and a vast neural network operating within the gut.

When consumed, the microflora that lives in fermented foods creates a favourable environment for this ecosystem to thrive. Consuming high quality fermented and probiotic foods will make sure you’re getting a healthy dose of bacteria, leading to benefits such as an increase in antibodies, a stronger immune system, regulation of appetite, along with a reduction of sugar and refined carb cravings.

Top fermented foods to boot your gut health:

- Yogurt
- Kefir
- Sauerkraut
- Tempeh
- Kimchi
- Miso
- Kombucha
- Pickles
Bachelor of Complementary Medicine

Complementary medicine (CM) refers to a broad set of healthcare practices that are generally not yet integrated into the dominant healthcare system. CM disciplines take a holistic view of illness and wellness, and encompass therapeutic approaches that address body, emotions, mind and spirit.

The course is designed for students who are interested in the Complementary Medicine field as a whole, and are interested in careers other than Clinical Practitioner. The course provides you with a broad perspective on the scope of CM in the overall context of today’s healthcare environment, including public health, ethics, research, health promotion and health behaviour.

With exposure to a wide variety of natural medicine disciplines, you will be able to develop a sophisticated appreciation of their interrelationships and potential contribution in multidisciplinary and integrative health settings.

Duration/Entry

- 3 years full time: 12 study hours per week
- 6 years part time: 6 study hours per week
- Fully online non-clinical degree

Entry Requirements:

- Direct entry
- Year 12 or equivalent (ATAR score not required)
- English language proficiency equivalent to a 6.5 IELTS result

Career Opportunities

- Managers, Patient Services Coordinators or Receptionists in multidisciplinary/integrative medicine clinic or health retreats.
- Clinic Assistant/Facilitator in behavioural change support programs (e.g. cardiac wellness).
- Policy Advisor/Writer at any level of government (health and lifestyle areas).
- Health store owners/operators.
- Product sales representatives for natural products companies.
- Customer service representative/advisor for health funds.
- Administration in a health-related not-for profit/charity organisation.
- Complementary medicine program administrator in aged care.
- Health and lifestyle advisor in fitness centres.
- Retail and pharmacy assistant.
DID YOU KNOW?

Australian complementary medicine industry has doubled in size over the last three years. Industry positions are the largest employment group in the complementary medicine sector.

If you’re interested in natural health but not seeking a practitioner role, or not sure where to start, the Bachelor of Health Science Complementary Medicine is an ideal place to begin your career. This 100% online degree allows you the flexibility to study remotely while providing you with a broad perspective in various areas of study. Should you then choose to follow the practitioner path, your Bachelor of Complementary Medicine can count as a credit towards any Bachelor of Health Science degree you choose, reducing the time and cost of your degree!*

The Bachelor of Complementary Medicine can kick start your career in the fields of Health Coaching, Lifestyle Services, Clinic Management, Aged Care Support and many more!

* All applications will be assessed individually by the Educational Pathways department and advanced standing granted may differ from the above dependent on course curriculum undertaken, including electives and subjects completed.
Extra support

A bridge to your natural health course

If science was not included in your subjects or even a strong point for you at school, you may be worried about how you will manage a natural medicine degree. The good news is we have bridging subjects to help you get your science and academic skills up to date, so you will have the best chance of success during your studies.

These bridging subjects can even be taken before you start your course or in parallel with your studies. As part of the Endeavour offerings we can also offer assistance with tutoring. To find out more, touch base with one of our friendly student advisors.

Interactive learning

It is important to find a study style that works for you – on campus or online, full-time or part-time, it is up to you. Our campuses are all based in central city locations and with a variety of study environments where you can learn and relax. Our teachers are industry professionals, passionate about their field and willing to share their knowledge and life experience with you. In our other Bachelor of Health Science degrees you will need to attend campus to complete parts of your course at scheduled times. Our Bachelor of Complementary Medicine is available fully online.

How learning online works

Some of our subjects are available online, which means you can choose where and when you study these subjects. This can be a great option if you’re balancing study with work and personal commitments. Our online learning platform uses the latest technology to create a rich and engaging learning experience. You will find extensive resources, lecture notes and videos and dedicated online tutors. Plus you will have many opportunities to interact with your teachers and classmates.

Our virtual library at your service

On campus or online across Australia you have access to hundreds of thousands of natural medicine resources via our library. Even better than this, you have a dedicated library team to help you research and use the various resources to succeed at your studies. You can access articles, e-books, animations, databases, videos, online tutorials and 3D training tools. From the first week of your course you will discover that library services are embedded into the curriculum, including our online library research skill tutorial. So it is pretty much a library that comes to you!
Support on your Endeavour journey

Student Services
Our Student Services team is here to help you during your journey at Endeavour. As you begin your studies with the College you will find yourself gaining new learnings, not only in the discipline you have chosen but also within the environment of taking a Higher Education degree.

The Student Services team is are here to assist with advice on how to manage your studies, managing timetables and study load, and help connect you with academic support teams, from the beginning of your studies all the way to graduation.

The Student Services team is your first point of contact when seeking support and they will be able to connect you with other departments should you need their help, to ensure you are supported with your learning and wellbeing needs on campus.

Student life on your campus should be an active, harmonious, ethical and positive experience centred on academic learning, research, professional and personal growth.

Seek out your Student Services team for:
> Student support on campus – FAQ’s & processes
> Connecting to Academic tutorial teams and support teams
> Connecting to campus life, activities and events
> Connecting to the Student Assistance Program (SAP) & support hotlines
> Connecting with Student Services Advisors about adaptability managing your studies
> Joining workshops on course progression, study planning, academic writing

Careers Service
Endeavour’s Careers Service assists students in identifying their values, career goals and the actions needed to take while studying to give you the best chance of achieving a successful career upon graduation. This is accomplished through students having access to careers advice appointments, and also having the opportunity to attend on-campus and online careers specific activities throughout the year. These career services include:
> Access to your own Career and Employability module
> On campus/Skype careers advisor appointments
> Access to Endeavour’s successful Natural Health webinar program
> Annual on-campus Careers Week activities
> Industry/employee/successful alumni presentations
> Job preparation assistance
> Access to Endeavour’s online jobs board
> Industry/alumni panels
> Access to employment preparation resources

Endeavour’s Careers Service looks forward to connecting with you early in your studies to commence planning your successful career within the natural health industry.

Wellspring Bookstore

Wellspring Bookstore is a health and well-being hub. There’s something for every budding healer in our extensive and holistic range, including natural health products, cook books, sustainable products as well as all the textbooks and tools you will need to help support and inspire you during your studies.

As an Endeavour student you will also receive a further 10% off the retail prices. Visit us online at endeavourbookstore.com.au or in store on the Brisbane campus.

Homegrown Range

Homegrown is a product range by Wellspring Bookstore that features handcrafted products by our very own Endeavour students and graduates. Endeavour College of Natural Health is home to a host of entrepreneurial students and a network of talented graduates. At Wellspring Bookstore we’re committed to supporting small business owners and it gives us great pleasure to support our own ‘homegrown’ talent.
Your next steps

If you’d like to map things out a little more:

- Attend an Open Day at our campuses, visit endeavour.edu.au/open-day
- Speak with our Career Advisors by phoning 1300 462 887
